CCTV Hard Disk Drive

The Facts of Security

What is CCTV hard disk drive?

Security camera hard disk drive, or known as a surveillance-rated hard disk drive (HDD), is primarily used for surveillance video footage storage 24/7 locally.

What is the main characteristic of a hard disk drive?

Hard disk drives are characterized by data read and write speeds. Mechanical hard disk drives are classified by how many times per second the internal disks rotate. However, raw speed doesn't always equate to better overall performance, the storage mechanism, connection type and device bandwidth also play roles.
